Number of Interns	1

Project Description

Research and compile key water facts and findings from authoritative sources on a wide array of water-related topics. Sources can include respected journals, PNAS studies, UN reports, Multi-lateral Development Bank studies and reports, etc. These factoids and statistics will be used in developing policy positions, speeches, and written products for senior State Department officials. Explore one new water-related topic per week throughout the period of the eInternship/academic year. An illustrative list of topics could include (but is not limited to): the value of water to economies; emerging water technologies; the nexus of water, food and energy; water and climate adaptation; water quality around the world; water within the UN system; water finance; integrated water resources management; and water treaties and governance.

Desired Skills Interests

Additional Information
